Tech Summit Notes

- Google Drawings
- Canva?
- Activities listed with links, directions, videos, google form to ask students to see what activity they are on
- Utilize google calendar for due dates
- Ed puzzle-puts prompts in the youtube video
- bit.ly/apsducttape

Peardeck
- Answer written responses and project on board get them on ipad
- Students sign in with google account
- You can see students responses instantly, they are submitted as they type
- You can lock the answer
- The timer is incorporated
- Utilize as pre-assessment, formative, quiz
- Display answers on grid, list, overlap drawings
- You can have them draw answers or circle. Whatever answers they circle can be shown overlapping
- Label and draw geometric figures
- Label items or picture vocabulary
- Draggables- dots, inequalities, graphing
- You can star specific answers to display
- Multiple choice, text, draggable, drawing answer choices
- You can add thumbs up or thumbs down question
- You can add agree or disagree question (true or false?)
- Student take away-students will get a youtube video of their notes/presentation, and their answers. It saves in their drive. They can ask me questions, take notes on the peardeck
- You can put a link that takes them right to the website on the presentation
- Link on how the math concept relates to real life
- Kahoot can speed it up and move them on to another slide
- You can publish it to google classroom
- Pear Deck Vocab
- You can import powerpoint, google doc, PDF
